Dear Sir:

The FDA must do more than put bacteria warning labels on egg cartons and regulate refrigeration temperatures.

It should stop the forced molting of hens to manipulate egg production, a practice that is nothing less than animal abuse. Forced molting means starvation and deprivation of water for the hens that are producing eggs we eat.

Sincerely,

A handwritten signature in black ink, appearing to read "B.B. Burroughs", written over a series of horizontal lines.

B.B. Burroughs
